

16 GB + RAM required

Open terminal in your project folder and run these 2 commands

```
python -m venv myenv
```

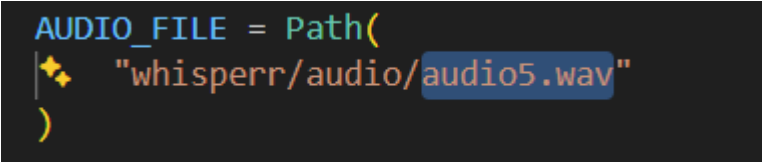

```
myenv\Scripts\activate
```

Install the packages inside requirements.txt

```
pip install -r requirements.txt
```

Put the audio file to be tested in whisperr/audio/ folder

Edit the audio file name in test_pipeline.py

```
AUDIO_FILE = Path(  
| ✨ "whisperr/audio/audio5.wav"  
| )
```

Finally run

```
python test_pipeline.py
```

The output will appear in “final_output” folder => english transcript + summary
